

Lower King Street Streetscape Update

June 13, 2008

- A public meeting was held last Friday, June 6th introducing the Streetscape Team from the City of Charleston, the prime contractor, ANSON Construction, Davis & Floyd Inc. Engineering and utilities and sub-contractor representatives.
- Bret Spicer was introduced to the merchants as the Community Liaison from ANSON Construction, and Susan Griffin with the City's Economic Development Office will serve as a contact person for anyone having questions and problems related to the project. Bret's number is 860-3696 and Su's number is 720-3886. This information will appear on every weekly flyer for quick access. Bret and Su are the "GO TO" team for Streetscape!
- Part of the Streetscape process is sewer rehabilitation which will begin in a preliminary way next week. The sewer crew will be videotaping with a robotic camera the sewer lines and lateral services to the buildings to determine current conditions and identify rehab needs. They will be working one block at a time. There should be minimal impact of this work on the street as the camera goes from manhole to manhole.
- ANSON will be in the area with blueprints working on the layout plans. Their work should not cause significant impact to traffic along the street.
- ANSON has been working with the scheduling company this week on the Critical Path schedule.
- There will be no groundbreaking activities taking place next week.

(Quote of the Week)

"At times, citizenship requires a bond for the common good beyond our own interests."
